

Curriculum Vitae

Name	Adrian Kraft
Date of Birth	22/05/2005
Address	Petersburgerstraße 43, Berlin
Phone	+49 176 66876554
Email	adriankraft05@gmail.com
GitHub	akra05

Education

2023 – Present **Technische Universität Berlin** [\[Modules\]](#)
Computer Science (B.Sc.)

- Current semester: 6
- Current ECTS points: 168 (only Bachelor thesis is missing)
- Current Grade: 2.1

2014 – 2023 **Heinrich-Schliemann-Gymnasium**
Abitur (High School Diploma)

- Advanced courses: Mathematics and Physics

Skills and Interests

Languages	German (native), English (proficient)
IT Skills	C, Python, Java, Assembly, HTML, SQL, Prolog, Haskell, Git
Hobbies	Chess (10 years of club experience)

Projects

ETL Pipeline (Data Integration & Large-Scale Analysis Coursework) [\[GitHub\]](#)

Built a pipeline ingesting real-world Deutsche Bahn timetable data for 133 Berlin stations into a PostgreSQL star schema, plus a parallel Apache Spark/Parquet path for large-scale analysis.

- Technologies: Python, PostgreSQL, Apache Spark (PySpark), Parquet
- Parsed JSON/XML source data into a star schema and wrote SQL/Spark analytics on delays, cancellations, and peak-hour departures

AI-Generated Image Detection (Architecture of Machine Learning Systems Coursework) [\[GitHub\]](#)

Built and tuned a CNN classifier to distinguish real from AI-generated images under a strict 30-minute CPU-only training budget.

- Technologies: Python, PyTorch, pandas, scikit-learn
- Engineered a preprocessing pipeline and handcrafted features (local contrast, saturation, noise residuals, original size) for the classifier
- Extended a baseline CNN with batch normalization, dual pooling, and focal loss; fine-tuned for robustness to compression, blur, and rescaling, reaching a calibrated Recall_{AI@FPR≤20%} of 0.79

BetterAlexa – AI Voice Assistant for Video Calls [\[GitHub\]](#)

Collaborated in a semester-long university team project on a speech- and text-driven AI assistant that joins a Zoom call directly, so several participants can talk to it live without leaving the call.

- Technologies: Python, OpenAI Whisper (speech-to-text), Llama 3 (reasoning & tool calling), web interface with database-backed login
- Integrated the assistant into Zoom (speech) and Discord (text), enabling live, ChatGPT-style conversations directly within a call

Portfolio Website

Portfolio site with all necessary information about myself and access to all my projects.

- Technologies: HTML, CSS, JS, Tailwind
- Link: akra05.github.io/portfolio

For additional projects, see github.com/akra05.
